

Falcon Complete Next-Gen MDR

Eradicate threats across the entire attack surface with the industry leader in managed detection and response (MDR)

Challenges

Today's adversaries are sophisticated in their attacks and more adept at exploiting blind spots across the attack surface to bypass defenses. With the fastest recorded eCrime breakout time in 2023 at just **2 minutes and 7 seconds**, it's clear that stealthy, multi-vector intrusions are the new norm.

To stay ahead of emerging threats, organizations must operate at maximum efficiency and rely on the right blend of skills and cutting-edge technology to build robust security operations that can defend against any attack anywhere. Ongoing skills shortages and increased complexity intensify the challenge of proactive threat detection and response, leaving security teams stretched thin and no closer to their objective of stopping breaches.

Solution

CrowdStrike Falcon® Complete Next-Gen MDR tackles these problems head on, combining cutting-edge, AI-powered cybersecurity technology with the industry's top security analysts to stop breaches across the entire attack surface 24/7 with unmatched speed and precision.

Powered by the industry-leading AI-native CrowdStrike Falcon® cybersecurity platform, Falcon Complete Next-Gen MDR expands the scope of visibility beyond native endpoint, identity and cloud security telemetry with third-party data from CrowdStrike Falcon® Next-Gen SIEM. With this third-party data, Falcon Complete Next-Gen MDR delivers unparalleled expert-driven investigation, response and surgical remediation.

Key service capabilities

Supercharge your SecOps with world-class expertise

- **Force multiplier for your team:** Fortify your defense with 24/7 protection from top security experts. Falcon Complete Next-Gen MDR delivers the expertise needed to close the skills gap and combat today's most advanced threats, including ransomware, phishing attacks and zero-day exploits.
- **Around-the-clock protection:** Adversaries never sleep; neither do we. With a global footprint and a follow-the-sun model, Falcon Complete Next-Gen MDR delivers seamless real-time protection and accelerated response to eliminate advanced cross-domain threats no matter when or where they occur.

Key benefits

- Stop breaches across the attack surface with 24/7 expert-led protection
- Gain immediate time-to-value with protection operationalized in days, not weeks or months
- Reduce operational overhead through staff augmentation
- Get outcomes, not homework, with full-cycle remediation delivered by the Falcon Complete Next-Gen MDR team

Disrupt advanced attacks

- **Accelerated defense along every point of attack:** Leveraging unified threat data, expanded visibility and cutting-edge generative AI from the Falcon platform, Falcon Complete Next-Gen MDR delivers the industry's **fastest mean time to detect (MTTD)** and up to a 75% reduction in mean time to respond (MTTR)¹ to counter the speed and sophistication of adversaries.
- **Intelligence-driven threat hunting:** Disrupt the most sophisticated adversaries with **CrowdStrike Falcon® Adversary OverWatch**, which delivers 24/7 protection across endpoints, identities and cloud workloads using advanced AI, industry-leading threat intelligence and unrivaled human expertise.
- **Delivering results, not homework:** With rapid response and end-to-end remediation delivered by our expert analyst team, Falcon Complete Next-Gen MDR ensures that every threat is acted on quickly and decisively, preventing downtime and expensive reimaging.

Stop the breach everywhere

- **Get proactive endpoint protection:** Falcon Complete Next-Gen MDR stops threats targeting your endpoints, stepping in to kill malicious processes, quarantine files and remove persistence.
- **Stop identity-based attacks:** Falcon Complete Next-Gen MDR stops identity-based attacks in their tracks, with real-time identity threat prevention and IT policy enforcement.
- **Secure cloud workloads:** Falcon Complete Next-Gen MDR uncovers and eradicates cloud intrusions in real time, delivering comprehensive managed protection for cloud workloads and containers.
- **Extend protection to critical data sources:** With unified threat data from Falcon Next-Gen SIEM, Falcon Complete Next-Gen MDR expands the scope of visibility and protection beyond native Falcon telemetry to accelerate threat investigation and eradicate threats earlier in the kill chain.

Third-party domains include:

- Email security
- Web security/cloud access security broker (CASB)
- Network detection and response (NDR)
- Secure remote access (VPN)
- Identity and access management (IAM)
- And more

What Falcon Complete customers say

"Falcon Complete's powerful combination of industry-leading security technology and elite MDR expertise are a match made in heaven, because with security vendors we often get great products but not a great team, or the team's great but not the product."

Russell Poole, Director of Information Systems and Support, University of Westminster

UNIVERSITY OF WESTMINSTER

"Falcon Complete provides operational efficiencies and augments our in-house security operations with 24/7 coverage, responsiveness and a level of visibility we didn't have before."

Thierry Delaitre, Head of IT Developments, Information Systems and Support, University of Westminster

About CrowdStrike

CrowdStrike (Nasdaq: CRWD), a global cybersecurity leader, has redefined modern security with the world's most advanced cloud-native platform for protecting critical areas of enterprise risk — endpoints and cloud workloads, identity and data.

Powered by the CrowdStrike Security Cloud and world-class AI, the CrowdStrike Falcon® platform leverages real-time indicators of attack, threat intelligence, evolving adversary tradecraft and enriched telemetry from across the enterprise to deliver hyper-accurate detections, automated protection and remediation, elite threat hunting and prioritized observability of vulnerabilities.

Purpose-built in the cloud with a single lightweight-agent architecture, the Falcon platform delivers rapid and scalable deployment, superior protection and performance, reduced complexity and immediate time-to-value.

CrowdStrike: We stop breaches.

¹ Projected estimate of average benefit based on recorded metrics provided by customers during pre-sale motions that compare the value of CrowdStrike with the customer's incumbent solution. Actual realized value will depend on individual customer's module deployment and environment.
