CROWDSTRIKE

Grant Support Program

Expanding Access to the Funding You Need

Federal and state grants are part of the budget picture for nearly every public sector agency in the country. But many agencies are understaffed for grant development or lack experience with grant programs that could dramatically increase their capacity to leverage technology to advance their missions and impact their communities.

The CrowdStrike Grant Support Program provides public sector agencies, educational institutions and hospitals with grant information, customized funder research and consultations that will help develop project ideas, get technology-rich projects funded and even expand initiatives that are already in the works.

To have your funding questions answered or engage in grant-seeking support, email grants@crowdstrike.com.

Top Grant Recipients

- K-12 Schools
- Colleges and Universities
- Local Governments
- Public Safety Agencies
- Hospitals and Clinics
- Government and Nonprofit Utilities

Project Consultation

Grants tend to fund projects that address a clearly identified need for a specific population or a defined geographic community. In addition, fundable projects should have measurable objectives and a compelling reason for including technology to achieve those objectives.

Grant Development Consultants with the CrowdStrike Grant Support Program work with public sector agencies, schools, colleges and healthcare institutions to help them develop and define their projects in the context of what funders want to support.

If you already have an idea of the technologies you'd like to purchase, Grant Development Consultants will help you clarify and articulate the needs the technologies will address and provide input on other elements that might further develop and strengthen your project.

Funder Research

More than 5,000 grant programs are opened each year in the U.S., providing approximately $500 billion in funding. Of course, not all of these programs are technology-friendly, and most of them have very specific parameters that define who may receive funding and what it may be used for.

With a few specifics about your concept, CrowdStrike Grant Support Program consultants will develop customized reports on funding opportunities that best fit the project.

The reports will identify the most relevant funders based on the project, your organization type (or types, in the case of a consortium project) and the geographic location where the project will be deployed. Then, the consultants will review their findings with you on a conference call, scheduled at your convenience.

Grant Development Support

To obtain funding for your technology projects, you will ultimately need to develop and submit competitive grant applications to a qualified list of funding prospects. No matter what capacity and resources you have to dedicate to developing grant proposals, the CrowdStrike Grant Support Program will help you see the process through.

Several proposal support services are available, from review and consultation with your organization's grant writer to full proposal development.

Grant Development Consultants will work with you to evaluate your needs and determine the level of support that will maximize the funding you can obtain and optimize the technology you are able to purchase with the grant funds you receive.

GRANTS OFFICE
empowering communities

Powered By Grants Office

To support the CrowdStrike Grant Support Program, CrowdStrike has engaged Grants Office, a global grant development services firm with a 20-year track record of helping public sector agencies find and secure funding for technology projects.
