

Falcon Complete Next-Gen MDR for SMBs

Empowering small and medium-sized businesses with fully managed 24/7 next-gen security protection

Challenges

Small and medium-sized businesses (SMBs) face a growing and complex threat landscape, exposing them to the same cyber risks as large enterprises. To address these evolving threats, SMBs require modern, comprehensive security measures, including endpoint, identity and cloud workload protection. However, as businesses grow in size and complexity, their cybersecurity needs become more sophisticated, often requiring expert resources or a fully managed solution to ensure comprehensive protection.

Unfortunately, many SMBs don't have the budget, time or personnel to build a security team capable of managing these demands around the clock. Yet cyberattacks can happen at any time – day or night – leaving your business vulnerable to potentially catastrophic breaches without 24/7 monitoring and response. This gap highlights the critical need for a managed solution that can provide enterprise-grade security without overburdening internal teams or resources.

Solution

CrowdStrike Falcon® Complete Next-Gen MDR is a managed detection and response (MDR) solution that's fully managed and designed to address the unique challenges SMBs face. It provides enterprise-grade protection by offering 24/7 access to a dedicated team of cybersecurity experts who handle everything from threat detection to response and remediation.

Powered by the AI-driven CrowdStrike Falcon® platform, Falcon Complete Next-Gen MDR stops even the most advanced cyberattacks while providing end-to-end threat remediation. Scalable to grow alongside your business, Falcon Complete Next-Gen MDR allows you to focus on your core business, delivering the expertise and protection you need without the complexity of managing security in-house.

Key benefits

- **Fully managed service:** 24/7 expert monitoring and response for unwavering protection
- **Disruption of advanced attacks:** Lightning-fast detection, AI-enhanced investigation and expert-led response to deliver immediate time-to-value and best-in-class protection
- **Fast deployment:** Quick and easy setup with protection operationalized in days, not weeks or months
- **Scalable solution:** Security that grows with businesses, tailored to evolving needs
- **Breach prevention warranty:** Peace of mind with the CrowdStrike Breach Prevention Warranty, provided at no additional cost¹

¹ The Breach Prevention Warranty is not available to all customers in all regions. See the [Breach Prevention Warranty FAQ](#) page for exclusions.

Key capabilities

- **24/7 Monitoring and Incident Response:** Continuous monitoring and threat detection delivers an immediate response to incidents by seasoned security professionals
- **AI-Powered Threat Detection:** Harnessing the power of machine learning and artificial intelligence, the Falcon platform detects known and unknown threats in real time and is fully managed for your organization
- **End-to-End Remediation:** Falcon Complete Next-Gen MDR's expert team takes full responsibility for remediation, ensuring threats are neutralized without requiring internal action
- **Transparent and Secure Collaboration:** You get fast access to CrowdStrike experts via the Message Center for secure bidirectional communication and real-time visibility into threats and emerging incidents
- **Scalability for SMB Growth:** As your business grows, Falcon Complete Next-Gen MDR grows with them – providing the right-sized security solution at every stage of your organization's growth

Industry recognition

- **Named a Leader by Forrester:** CrowdStrike named a Leader in The Forrester Wave™: Managed Detection and Response, Q2 2023
- **Named a Leader by IDC:** CrowdStrike named a Leader in the IDC MarketScape: Worldwide Managed Detection and Response 2024 Vendor Assessment
- **Growth Leader in MDR:** Frost & Sullivan named CrowdStrike a leader in the Frost Radar: Managed Detection and Response, 2024

What customers say

“CrowdStrike performed as if I had someone onsite 24/7 monitoring our assets all the time, even at three o'clock in the morning. It gives me the ability to go home and relax.

– Rusty Haferkamp,
CISO, Central National
Bank of Waco

About CrowdStrike

CrowdStrike (Nasdaq: CRWD), a global cybersecurity leader, has redefined modern security with the world's most advanced cloud-native platform for protecting critical areas of enterprise risk — endpoints and cloud workloads, identity and data.

Powered by the CrowdStrike Security Cloud and world-class AI, the CrowdStrike Falcon® platform leverages real-time indicators of attack, threat intelligence, evolving adversary tradecraft and enriched telemetry from across the enterprise to deliver hyper-accurate detections, automated protection and remediation, elite threat hunting and prioritized observability of vulnerabilities.

Purpose-built in the cloud with a single lightweight-agent architecture, the Falcon platform delivers rapid and scalable deployment, superior protection and performance, reduced complexity and immediate time-to-value.

CrowdStrike: We stop breaches.
